

## Bio/CV

**AdeY**'s work captures those little moments of social oppression, humour, isolation, anxiety and depression. It recognises that we not only change in relationship to our environment but that our environment adapts to what we become.

The images depict imbalances evident in contemporary society today by directly addressing issues of gender, normative behaviour and how society forces us to choose one direction or path. The subjects show our vulnerability, loneliness, strengths and expectations whilst highlighting the correlation between body and space.
