Born in Ferrara (Italy) 1974.

Artist Statement:

I like to use every film format, every medium and support, and mix them together.

This practice gives me the real feeling I need to tell my stories. I like to think there aren't boundaries in this and I like to create questions despite answers.

I like to suggest through my works rather than tell. My works are metaphors to move through past present and the unknown future. Analog photography gives the chance to have errors by my side and let them become my personal reference and own style in photography.
